EDUCATION

Shiraz University of Medical Sciences — *Doctor of Medicine (M.D.)*
2013 – 2020

PROFESSIONAL EXPERIENCE

Mayo Clinic — *Instructor of Regenerative Medicine*
Nov 2026 – Present · Rochester, MN

Department of Surgery – Surgical Innovation, Mayo Clinic — *Research Fellow*
2024 – Present · Rochester, MN

- Involved in about 40 surgical research projects, including 30+ IRB-approved studies and several industry collaborations across thoracic, bariatric, plastic and reconstructive, and abdominal-wall surgery.
- Works across the study lifecycle: design, IRB preparation, data curation, statistical analysis, manuscript writing, and patient recruitment.
- Builds AI-ECG and machine-learning models for surgical risk prediction and the Mayo Obesity Staging Index (MOSI) for bariatric decision support.

Mayo Clinic — *Research Affiliation – A-Star Lab*
2025 – Present · Rochester, MN, USA

- Surgical AI and computer vision research; teaching assistant for the computer vision session of the ACS Clinical Congress 2026 hands-on AI course.

Thoracic & Vascular Surgery Research Center, Shiraz University of Medical Sciences — *Senior Researcher & Project Manager*
2018 – 2024 · Shiraz, Iran

- Managed clinical and translational research projects at the Thoracic and Vascular Surgery Research Center.
- Founded and directed a research mentoring program; mentored 15 medical students who contributed to 50+ peer-reviewed publications.

Khatam-al-Anbiya Hospital — *General Practitioner — Emergency Department*
2020 – 2022 · Bushehr, Iran

SURGICAL INNOVATION PROJECTS · MAYO CLINIC

- **ApoQlar × Apple Vision Pro** — Real-time stereoscopic 3D visualization for robotic surgery
- **GoNoGoNET** — AI-assisted surgical video analysis and safety-zone identification
- **ALARM / OmniWatch** — Wearable-based postoperative monitoring
- **INTERCEPTION & Alpenglow** — Robotic bronchoscopy, biopsy, and molecular sampling
- **CTA Perforator** — Computer vision-based reconstructive surgical planning
- **JelloX** — 3D digital pathology
- **Robotic surgery curriculum** — Curriculum development to improve resident training

SELECTED PUBLICATIONS

Metabolic and Bariatric Surgery and Change in the AI-ECG–Derived Biological-Age Gap: A Longitudinal Cohort Study
Obesity Surgery · 2026 · First author

Prediction of Sentinel Lymph Node Metastasis in Breast Cancer Patients Based on Preoperative Features: A Deep Machine Learning Approach
Scientific Reports · 2024 · First author

Global Trends and Research Landscape of Robotic Surgery in Plastic and Reconstructive Surgery: A Bibliometric Analysis (1999–2025)
Journal of Robotic Surgery · 2026 · Co-first author

200 peer-reviewed publications in total. Full list: Google Scholar.

RESEARCH IMPACT

200 peer-reviewed publications (47 first/co-first, 48 senior)

3,625 citations · h-index 25

149 peer reviews for 67 journals

2 issued patents

Google Scholar, November 12, 2026

SKILLS

- Study design
- RCT coordination
- Data management
- Statistical analysis
- Systematic review and meta-analysis
- Clinical research coordination
- IRB preparation
- Machine learning and predictive modeling
- Scientific writing and editing

TOOLS

SPSS · Python · MATLAB · NCSS · EndNote

PATENTS

A Machine Learning-Based System for Detecting Leishmaniasis in Microscopic Images
Apr 2021 · Patent IR 140050140003000416

Utilization of Chest Tube in Pediatric Caustic Injuries: A New Method for Esophageal Stenting
Oct 2020 · Patent IR 139950140003006653

HONORS

Team Collaboration Award (Project Lead)
Mayo Research Fellows' Association · Sep 2026

World's Top 2% Scientists
Elsevier Data Repository / Stanford · Dec 2023

National Outstanding Student Researcher
Iran Ministry of Health and Medical Education · Oct 2020

EDITORIAL

Guest Editor
PLOS One · June 2022

Associate Editor
Shiraz E-Medical Journal · August 2021

LANGUAGES

English (Fluent) · Farsi (Native)
